No. of individuals using PPE's 4

Reinspection by: g d joslin Date: Time:

Findings:

[Empty box for Findings]

Reinspection Scheduled for: Date: _____ Time: _____ (If Needed)

Comments:

Rec'd sev emails from DEP - J Vernon - re: job, plus e photos. An Envir. Group had been on site - and had made pic. And appears to have made statements - not correct. To site - noted New and Gauley running high and muddy. Big creek is running muddy - while several side drains were running clear. Company was pulling a culvert from a crossing below pond = yellow muddy water - which drained down the road in entered the creek. Culvert from pond drain - appears to be running - and water may be seeping around it too. Culvert is old and rusted. A meeting - reported by R. Bowen - held this AM - had all agreed that he move out of area - to site up left fork. Landowner and Coal company at said meeting. Issued a Compliance Order for reclamation and instillation of BMP's to the site. Seeding and mulching in the SMZ also restated. Fast melting of the snow + several days of rain did not hepl site.

Complainant: _____

Phone: _____

Address: _____

Source of Complaint:

- Private _____
- DEP _____
- Other Agencies _____
- Division of Forestry _____

Complainant Notified: Date: _____ Time: _____

Additional Space if Needed:

Local weather reports from area TV stations - had small stream flooding warnings up.
